

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

IN CERTAIN STATES AND CITIES.

RECIPROCAL NOTIFICATION.

Minnesota.

Cases of communicable diseases referred during March, 1914, to other State health departments by the division of epidemiology of the Minnesota State Board of Health.

Disease.	Notified at—	Referred to health authority of—	Why referred.
Scarlet fever....	Seeley township, Faribault County. Austin, Mower County....	Kanawha, Hancock County, Iowa. Chamberlin, Brule County, S. Dak.	Resident of Kanawha, Iowa. Resident of Chamberlin, S. Dak.
Smallpox.....	St. Paul, Ramsey County. Minneapolis, Hennepin County.	Aberdeen, Brown County, S. Dak. Valley Junction, Polk County, Iowa.	Came from Aberdeen, S. Dak. Probably infected at Valley Junction, Iowa.
Tuberculosis....	Pokegama Sanatorium, Pokegama, Pine County.	Chicago, Cook County, Ill... Pierpont, Day County, S. Dak. Excelsior Richland County, Wis. Alcester, Union County, S. Dak. Ambrose, Divide County, N. Dak.	Resident of Chicago, Ill. Resident of Pierpont, S. Dak. Resident of Excelsior, Wis. Returning to Alcester, S. Dak. Returning to Ambrose, N. Dak.

SMALLPOX.

Indiana—Evansville.

Surg. Oakley, of the Public Health Service, reported by telegraph that during the week ended April 25, 1914, 16 cases of smallpox had been notified in Evansville, Ind.

Texas—Galveston.

Surg. Bahrenburg, of the Public Health Service, reported by telegraph that during the week ended April 24, 1914, 7 cases of smallpox had been notified in Galveston, Tex.

SMALLPOX—Continued.

LEPROSY.**California—Los Angeles County.**

Senior Surg. Brooks reported, April 14, that a leper (suspect) had been notified to the Los Angeles health department April 7. The patient, a Chinaman 18 years old, had been removed to the Los Angeles County Hospital.

With him at the county hospital are also confined two other male lepers. Surg. Brooks reports that during the week ended April 14 two lepers had escaped from this hospital and were still at large. The place where the male lepers are isolated is reported to consist of comfortable quarters, with attached flower and vegetable gardens.

There is also a female leper in the person of an Italian woman, who is isolated in a small room of the building for contagious diseases. This woman wishes to return to Italy and has sufficient money for the expenses of the journey, but the difficulties attending transportation are such that the trip has not been undertaken.

PLAGUE.**California—Squirrels Collected and Examined.**

Ground squirrels have been examined in California for plague infection as follows: Week ended April 4, 1914, Contra Costa County, 6 squirrels; San Benito County, 15 squirrels. Week ended April 11, 1914, Alameda County, 42 squirrels; Contra Costa County, 195; Merced County, 11; Monterey County, 55; San Benito County, 91; San Joaquin County, 13; Santa Clara County, 14. No plague-infected squirrel was found.

Maintenance of a Squirrel-Free Zone.

During the week ended April 4, 1914, 77 acres of land in Alameda County, 582 in San Joaquin County, and 60 in Stanislaus County were treated with squirrel destructors. During the week ended April 11, 1914, 80 acres of land in Alameda County, 310 in San Joaquin County, and 529 in Stanislaus were treated with squirrel destructors.

PLAGUE—Continued.**Washington—Seattle—Plague-Infected Rat Found.**

Surg. Lloyd, of the Public Health Service, reported April 16, 1914, the finding of a plague-infected rat at Seattle, Wash.
